KEY FACTS
MES GRIZZLY 24

The MES GRIZZLY 24 is the ultimate crew transfer and pushboat hybrid. Featuring offshore capable hull construction with self bailing decks, the spacious shelter and ample deck space allow comfortable, safe passageway for ship-to-shore operations. Constructed with an increased gunnel height for added safety while working or under way.

Equipped with high output LED lighting atop the cabin, crew also enjoy safe transfer from the vessel onto raised platforms such as sectional Poseidon floats, and other vessels.
